Software Engineer

Software Engineer with 6+ years of experience building production web applications using TypeScript and React, with a strong focus on accessibility, performance, and code quality. Experienced in delivering user-facing features on content-rich platforms and collaborating closely with design, backend, and QA to ship reliable, well-tested interfaces. Motivated by building clear, inclusive digital experiences that scale.

SKILLS

Programming & Technologies: JavaScript(ES6+), React, Native, Next.js, Lightning.js, TypeScript, Three.js, TailwindCSS, Node.js, Jest, SQL, Postgres, Nest.js, Express.js, Django, Python.

Tools: Git, AWS(EC2, S3), Docker, Figma, Storybook, Playwright, Jenkins, Terraform, Redux, Circle CI, Turbo repo, Kubernetes, Vite, SonarCloud, Linux, VS Code, Android Studio, PNPM, Agile.

EXPERIENCE

OASIS Group – Information Secured

London, UK

Software Engineer (TypeScript, React, Node.js)

Mar 2024 – Jan 2025

- Led development of a public-facing web platform using Next.js, focusing on performance, accessibility, and security.
- Built reusable UI components and patterns with React to support a growing, content-driven product.
- Worked closely with designers to accurately translate designs into responsive, accessible interfaces.
- Integrated third-party APIs and ensured reliable frontend behaviour under real-world usage.
- Mentored engineers through code reviews and design discussions, promoting consistent frontend standards.

FX Digital (connected devices; Amazon Fire TV Stick)

London, UK

Software Engineer (TypeScript, Lightning.js, React, Node.js)

Jan 2025 – Present

- Delivered features, integrations and production fixes across BritBox WebTV and Kepler/Vega connected-TV applications, leading multiple major releases.
- Built and improved Lightning JS and TypeScript user journeys, including authentication, subscriptions, in-app purchases and platform-specific playback controls.
- Led complex third-party integrations including ATI Piano analytics, Redfast subscription prompts, commerce services and Alexa voice controls, adapting solutions to connected-TV platform constraints.
- Integrated third-party APIs and ensured reliable frontend behaviour under real-world usage.

Signapse AI (Startup)

London, UK

Frontend Engineer Lead (Next.js, TypeScript, Three.js)

Dec 2022 – Mar 2024

- Led development of a production video translation platform built with **Next.js**, contributing to architectural decisions and performance optimisation strategies.
- Worked across frontend and backend integrations, consuming third-party APIs and ensuring resilient system behaviour under real-world usage.
- Established CI/CD workflows using **Jenkins and GitHub Actions**, improving release reliability and deployment speed.
- Mentored engineers through code reviews and technical guidance, fostering strong engineering standards within a growing team.

Conigital Group

Birmingham, UK

Software Engineer (Node.js, NestJS, React, PostgreSQL, Python)

Mar 2019 – Dec 2022

- Built scalable backend services using Node.js and NestJS within a microservices architecture supporting real-time data processing.
- Designed and implemented secure authentication and role-based access control, strengthening system security and compliance.

ACTIVITIES AND LEADERSHIP

West African Union University

Porto Novo, Benin

Lecturer II for CS 213(Survey of programming languages)

Jan 2019 – Mar 2019

EDUCATION

Coventry University

Coventry, UK

M.SC in Computer Science(focus: Data Structure & Algorithms)

Jan 2022 – Dec 2022
